Projects

Easygifte

Developed a comprehensive digital voucher solution that includes a user-facing website, separate dashboard panels for admins, companies, and stores, as well as two mobile apps—one for users and one for stores. The platform enables users to securely receive money and make payments at select stores via QR code scanning. The admin dashboard allows for oversight of the entire system, while the company and store dashboards provide tailored tools for managing voucher distributions, monitoring transactions. The mobile apps facilitate seamless transactions, with the user app focused on voucher redemption and the store app designed for easy payment processing and transaction management.

Winnbet dz

Developed a web and mobile application designed for landlords and hotels to list properties, manage rentals, and streamline bookings for a seamless experience. The platform includes an admin panel for overall system management, a website for users to browse and book properties, and a mobile app for on-the-go management and booking. The system provides landlords and hotel operators with tools to efficiently handle property listings, track reservations, and manage rental agreements, while offering users an intuitive interface for discovering and booking accommodations.

Projects

Bschool

Developed an innovative web and mobile e-learning platform that allows students to purchase subscriptions through QR code scanning. The platform offers a seamless user experience for accessing educational content and managing subscriptions. The website provides students with a comprehensive learning environment, while the mobile app ensures accessibility and convenience for on-the-go study. QR code integration simplifies the subscription process, making it quick and easy for students to start their learning journey.

Adjyal

Developed a real estate management system featuring a web-based admin dashboard and a mobile app. The web admin dashboard provides comprehensive tools for managing property listings, tracking transactions, and overseeing client interactions. The mobile app offers users a convenient way to access property information, manage listings, and communicate with clients on the go. The system streamlines real estate operations, enhancing efficiency and accessibility for both administrators and users.

Hammer Group

Developed an all-in-one HR management platform that includes a web-based admin dashboard and a mobile app for both employees and managers. The web admin dashboard offers comprehensive tools for HR administration, including employee management, payroll processing, and leave management. The mobile app provides employees with easy access to HR services such as leave requests, documents requests, and many more, while managers can use the app to oversee team activities, approve requests, and review performance metrics. This integrated solution enhances HR efficiency and streamlines communication across the organization.

Poulet Vert

Developed a presentation website for Poulet Vert, a company specializing in 100% natural, chemical-free chickens. The website showcases the company's commitment to quality and transparency throughout the supply chain, from farm to table. It features detailed information about their farming practices, product offerings, and dedication to sustainability, providing visitors with an engaging and informative experience that highlights the brand's values and product excellence.

Deo Electronique

Developed a presentation website for Deo Electronique, a leading provider of innovative, customized industrial solutions and services. The website highlights the company's expertise and offerings, featuring detailed information on their tailored solutions, industry applications, and success stories. Designed to effectively communicate their unique value proposition and commitment to excellence, the site provides a professional platform to showcase their capabilities and engage potential clients.

DH Electromate

Developed an e-commerce website for DH Electromate, specializing in electronic products. The website features a user-friendly interface that allows customers to easily browse, search for, and purchase a wide range of electronic items. It includes product categories, detailed descriptions, customer reviews, and secure payment options. The platform is designed to provide a seamless shopping experience, with intuitive navigation and efficient order management for both customers and administrators.
